5" "	12-15"	.75	6.50
5" "	2-3'	.85	

C. FOVEOLATA. FITTED Cotoneaster. An interesting shrub of irregular growth, reaching a height of 10 ft. Elliptic leaves two to three inches long. Pinkish flowers in June followed by glittering black berries in Sept.

5" pots,	2-3'	.80	7.50
6" "	2-2½'	.85	7.50

C. FRANCHETTI. An upright dense half-evergreen shrub. Deeply-veined rich green leaves, grayish-white beneath. Small pinkish flowers in June. Red fruits in Sept.-Oct., accompanied by rich red and orange coloring of the foliage which remains until almost spring.

4" pots,	8-10"	.65	5.50
5" "	15-18"	.75	6.50
5" "	1½-2'	.85	7.50

- C. HARROVIANA.** A semi-evergreen introduction from China with leathery leaves 2" long. The white flowers are borne in dense clusters to 1½ in. across.

| 4" pots, | 6-8" | .65 | |
| 4" " | 8-10" | .75 | |
- C. HENRYANA.** A more open grower than *Salicifolia*, being more tree-like and so has less of a well-clothed, shrubby appearance. Fruit colors early in September, taking on a bright orange-red shade.
- | | | | |
|----------|--------|-----|------|
| 4" pots, | 10-12" | .65 | 5.50 |
|----------|--------|-----|------|
- C. HORIZONTALIS.** Rock Cotoneaster. Curious dwarf half-evergreen shrub of trailing habit, fine for rockeries where it needs a full open sunny position. It is covered with brilliant red berries in autumn and winter. The foliage turns to soft tints of red and bronze before falling.
- | | | | |
|-----------------|---------------|-----|------|
| 4½ and 5" pots, | 10-12" spread | .65 | 5.00 |
|-----------------|---------------|-----|------|
- C. HORIZONTALIS MINOR.** Dwarf Rock Cotoneaster. Smaller and neater than its parent, but even more effective in rock work. The bright red berries are generally larger, leaves are smaller but more numerous.
- | | | | |

| 4½" " | 8-10" | .75 | 6.50 |
| 5" " | 8-10" | .80 | |
- C. MICROPHYLLA.** Rock Spray. A very showy dwarf evergreen type with small shiny leaves, having long hairs beneath. The pretty white flowers are followed by scarlet, comparatively large berries. Its compact growth makes it a useful rock plant.
- | | | | |
|----------|-------|-----|------|
| 4" pots, | 4-6" | .65 | 5.25 |
| 5" " | 8-10" | .80 | 7.25 |
- C. MICROPHYLLA THYMIFOLIA.** Thyme Rockspray. A Himalayan evergreen Rock Spray with narrower leaves than the type and with the flowers borne in clusters of two-to-four instead of appearing single.
- | | | | |
|----------|------|-----|--|
| 4" pots, | 4" | .65 | |
| 4½" " | 6-8" | .75 | |
- C. MOUPINENSIS.** Moupin Cotoneaster. Spreading shrub to 6 ft., with ovate-acuminate leaves nearly glabrous above, pale grayish-green and pubescent beneath. Pinkish flowers. Red, subglobose fruit.
- | | | | |
|----------|--------|-----|--|
| 5" pots, | 15-18" | .75 | |
|----------|--------|-----|--|

- C. PANNOSA.** Semi-evergreen shrub that eventually reaches a height of 6 ft. Its elliptic leaves are glabrous above and grayish-white beneath. Red fruits in fall. Needs protection in northern states.
- | | | | |
|----------|--------|--------|----|

| 4" pots, | 6-8" | \$.65 | |
| 5" " | 10-12" | .80 | |
- C. PANNOSA NANA.** Dwarf, compact form of Pannosa.
- | | | | |
|-----------|------|-----|--|
| 4½" pots, | 6-8" | .75 | |
|-----------|------|-----|--|
- C. PARNAYI.** Not unlike Salacifolia, but leaves are more round. The graceful arching stems are very charming.
- | | | | |
|----------|-------|-----|------|
| 4" pots, | 8-10" | .65 | 5.00 |
| 5" " | 6-8" | .75 | |
- C. PRAECOX.** Early Cotoneaster. A very fine semi-prostrate grower with large bright red berries as early as the end of June, months before any other. One of the best never introductions.
- | | | | |
|----------|--------|-----|--|
| 5" pots, | 10-12" | .75 | |
|----------|--------|-----|--|
- C. PROSTRATA.** A tall handsome semi-evergreen shrub up to 12 ft. with slender, arching branches. The dark shiny leaves are ¾ in. long and slightly hairy beneath. The white flowers are borne in one-to-three flowered clusters followed with a beautiful display of red berries. A Himalayan type which probably needs protection in the north.
- | | | | |
|----------|-------|-----|------|
| 4" pots, | 4-6" | .65 | 5.50 |
| 4½" " | 8-10" | .75 | 6.00 |
- C. RACEMIFLORA SOONGARICA.** A 4 ft. shrub with erect or spreading branches, rarely prostrate. Oval leaves, grayish-white beneath, and beautiful red fruit.
- | | | | |
|----------|--------|-----|------|
| 4" pots, | 10-12" | .75 | 6.50 |
|----------|--------|-----|------|
- C. SALACIFOLIA.** Very graceful, with willow-like foliage which is especially attractive in fall in contrast with the bright red fruits.
- | | | | |
|----------|--------|-----|------|
| 4" pots, | 10-12" | .65 | 5.50 |
| 5" " | 13-24" | .80 | |
- C. SALACIFOLIA FLOCCOSA.** Large-growing shrub of graceful habit with willow-like foliage. The bright red fruits extend well along the branches and are not clustered as on Salacifolia.
- | | | | |
|----------|--------|-----|------|
| 4" pots, | 10-12" | .65 | 5.50 |
| 5" " | 12-15" | .85 | 7.50 |

C. SIMONSI. An interesting almost evergreen Himalayan introduction up to 10 ft. high with leaves to 1½ in. long, pubescent beneath. A good grower of loose habit, with white flowers in two-to-four flowered clusters, followed by bright red berries in the fall.

		<u>EACH</u>	<u>10</u>
4" pots,	8-10"	\$.65	\$5.50
6" "	10-12"	.85	7.50

C. WILSONI. This is perhaps the best form of its type. The arching, overlapping sail-like branches will grow to 4 ft. forming a neat hummock-like mass. The pale green leaves which are pubescent beneath and the white flowers borne in paniced clusters make it a suitable specimen for the open border as well as a fine screen against walls.

4" pots,	4"	.65	5.00
----------	----	-----	------

C. ZABELI. A deciduous shrub reaching a height of 6 ft. Leaves 1½" long, gray-tomentose beneath. Flowers pinkish, in nodding 3 to 9 flowered clusters. Fruit bright red. China.

3 to 4 ft. fieldgrown plants,			
B&B		1.25	11.00
